Available for Co-op: Winter 2027 - Summer 2027

EDUCATION

University of British Columbia

September 2023 – May 2028

Bachelor of Science in Computer Science with minor in Commerce

Vancouver, BC

- Outstanding International Student Award

WORK EXPERIENCE

Incoming Software Engineer Co-op

July 2026 – December 2026

Workstream

Burnaby, BC

CPSC 310 Undergraduate Teaching Assistant

September 2025 – June 2026

University of British Columbia

Vancouver, BC

- Worked as part of a teaching team supporting 848 students in the Introduction to Software Engineering course
- Guided students on async programming, Express.js REST API, and test case development in TypeScript projects

Software Engineer Co-op

May 2025 – August 2025

Agoda Services (subsidiary of Booking Holdings Inc.)

Bangkok, Thailand

- Developed a load testing suite using Grafana k6 with randomized input data, simulating up to 500 req/sec and logging metrics to Grafana dashboards to proactively validate system performance before new feature rollouts
- Stabilized GitLab CI/CD pipeline by integrating MockAPI endpoints to fix flaky integration tests and upgrading dependencies to address security vulnerabilities, ensuring tests run on every merge request
- Improved Cashback processing logic in a C# (.NET Core) API by creating SQL stored procedures and integrating a GraphQL API, automating cases that previously required manual review

Software Developer Intern

June 2024 – August 2024

Applicad Public Company Limited

Bangkok, Thailand

- Developed a real-time facial recognition web app using Next.js, FastAPI, ChromaDB, PostgreSQL, and SQLAlchemy, integrated with the existing internal database
- Deployed the application and databases to an on-premises Ubuntu server using Docker and Docker Compose

PROJECTS

UBC Newcomers - UBC CIC Spring 2026 Hackathon Winner 🏆 | *FastAPI, React Native*

May 2026

- Built an AI matchmaking system for a first-year student networking app, using Claude Sonnet via AWS Bedrock to analyze profiles (interests, faculty, year) and generate compatibility scores for peer suggestions
- Designed a FastAPI backend on AWS (ECS, RDS, Cognito) serving event recommendations, exploration tracking, and UBC student verification via email OTP
- Shipped a React Native app with an interactive campus map, live event pins, geofenced landmarks that unlock through exploration, and a progress leaderboard

PipeLie - MLH Meta Production Engineering Hackathon - Reliability Track Winner 🏆

April 2026

- Built a URL shortener API using Flask and Valkey caching, reducing response times for repeated lookups
- Provisioned a 3-node K8s cluster on bare-metal Dell Optiplex, deploying the app as 3 replicas behind Traefik ingress with high-availability PostgreSQL (CloudNativePG, streaming replication) and Valkey sentinel caching
- Designed CI/CD pipelines in GitHub Actions with service containers and diff-coverage checks on PRs, automated container builds to GHCR, and deployment to K3s via a self-hosted runner on merge to main
- Built an observability stack with Prometheus, Grafana dashboards, Loki log aggregation, and Alertmanager

BitRelay - EDT Design Competition 2026 - Best Social Impact Award Winner 🏆 | *Python*

March 2026

- Built an ESP32 BLE relay node for bitchat using MicroPython and aioBLE, extending Bluetooth mesh range for communication during internet shutdowns and disasters

TECHNICAL SKILLS

Languages: Python, Golang, TypeScript, Dart, C, C++, C#, Java, R, HTML, SQL

Libraries & Frameworks: FastAPI, Node.js, Express.js, Tailwind CSS, React, JUnit, Mocha, Chai, Jest, Playwright

Developer Tools: Git, GitHub, GitHub Actions, GitLab, Linux, Docker, Docker Compose, Kubernetes, HAProxy, NGINX, Grafana, Cloudflare, AWS, GCP, ChromaDB, PostgreSQL, Swagger
